

I have had XM radio for about six months. I was happy to hear that a Traffic and weather report station was going to be added for my area. My job involves me traveling about 100% of the time. Knowing that I can turn to a station that lets me know if there are traffic jams or severe weather on my way home helps greatly. There have been several times that I have changed my route home because I heard about an accident. Local radio stations only provide traffic reports every 15 to 30 min. I need to know the minute I get into my car. I pay for this convenience. I also pay for cable, because I can't get local channels on my TV. Now that I shouldn't have to pay for. So the bottom line is, I enjoy the service I pay for and hope I can continue to enjoying it!
